PROFESSIONAL SUMMARY

Artificial Intelligence & Machine Learning undergraduate with hands-on experience in machine learning, LLM applications, AI automation, data analytics, and full-stack development. Builds practical, production-oriented software using Python, PyTorch, TensorFlow, LangChain, OpenCV, Django REST Framework, React, TypeScript, Astro, Streamlit, and n8n.

EDUCATION

B.Tech. in Artificial Intelligence & Machine Learning *2023 - 2027*

Ramrao Adik Institute of Technology (RAIT), D. Y. Patil University *Navi Mumbai, India*

• CGPA: **8.7/10**

PROFESSIONAL EXPERIENCE

AI & Web Developer Intern *Jul 2026 - Present*

3DOTS Creative Solutions *Remote*

• Designed and shipped a production marketing website using Astro, TypeScript, and CSS; implemented technical SEO, an accessibility-first motion system, and responsive interactions.

• Built a Playwright testing suite across 12 viewport widths and automated client lead-intake and WhatsApp/email follow-up workflows with n8n; currently extending the solution with an AI chatbot.

Virtual Intern - Full Stack Development *Sep 2026 - Oct 2026*

DecodeLabs *Remote*

• Completed the DecodeLabs Virtual Internship Program in Full Stack Development, delivering real-world project work and collaborative problem-solving tasks.

Data Analytics Intern *May 2026 - Jun 2026*

D. Y. Patil University *Navi Mumbai, India*

• Cleaned, transformed, and engineered features across real-world datasets with Python and Pandas; built reusable scripts and summary reports for faculty stakeholders.

SELECTED PROJECTS

CascadeSignal | Python, Hawkes Point Processes, On-Chain Data, Pandas *Aug 2026*

• Modeled 73,000+ Aave v2/v3 liquidation events with a self-exciting Hawkes process and a USD-marked branching-ratio early-warning signal for DeFi liquidation cascades.

• Detected 100% of major cascades (98/98 Aave v2; 45/45 Aave v3) in pre-registered walk-forward evaluation; warned ahead of 81% of eventually-liquidated USD on Aave v2 ($3.34B of $4.11B).

LipSync AI | Python, PyTorch, MediaPipe, Django REST Framework *2026*

• Built a real-time lip-reading pipeline using FaceMesh landmarks and a bidirectional GRU, served through a JWT-secured Django REST API with session caching, emotion analysis, and a Vue/Nuxt frontend.

InsightX - LLM-Powered Complaint Intelligence | Python, Streamlit, LangChain, Llama 3 *2025*

• Built a local Llama 3 complaint-intelligence pipeline that identifies categories, locations, and sentiment trends through an interactive Streamlit dashboard with report export.

Smart Attendance System | Python, Tkinter, OpenCV, Pandas *2025*

• Developed a role-based facial-recognition attendance platform with time-limited QR check-in, automated email/PDF/Excel reporting, and audit logs.

TECHNICAL SKILLS

Languages: Python, Java, C++, C, JavaScript, TypeScript, SQL

AI/ML: PyTorch, TensorFlow, Scikit-learn, XGBoost, LangChain, OpenCV, MediaPipe, Pandas, NumPy, LLM Applications, Computer Vision, NLP

Web & Tools: React, Node.js, Astro, Django REST Framework, Flask, Streamlit, n8n, Git/GitHub, Playwright, pytest, Vercel, Netlify

Certifications: NVIDIA - Building LLM Applications with Prompt Engineering; IIM Bangalore (edX) - FC101x: Corporate Finance; Accenture (Forage) - Software Engineering Job Simulation; Google Cloud - Career Launchpad Generative AI Leader Track
