## EDUCATION

**Ramrao Adik Institute of Technology (RAIT), D. Y. Patil University**

Navi Mumbai, India

*Bachelor of Technology, Computer Science & Engineering | CGPA: 8.62/10*

2023 – 2027

## EXPERIENCE

**Freelance AI Automation & Web Developer**

Jul 2026 – Present

*Self-Employed*

*Remote*

- Designed and shipped a production marketing website for 3DOTS Creative Solutions (a creative agency) using Astro, TypeScript, and CSS, implementing on-page SEO (dynamic sitemap, robots.txt, schema.org markup), an accessibility-first motion system, and a Playwright test suite covering forms, navigation, and responsive layout across 12 viewport widths
- Automated the client's lead-intake and follow-up workflow with n8n, routing website form submissions to email and WhatsApp automatically; currently extending the site with an AI chatbot

**Data Analytics Intern**

May 2026 – Jun 2026

*D. Y. Patil University*

*Navi Mumbai, India*

- Cleaned and engineered features across large, real-world datasets in Python (Pandas), building reusable scripts that turned raw data into concrete insights and summary reports for faculty stakeholders

## PROJECTS

**CascadeSignal** | *Python, Hawkes Point Processes, On-Chain Data, Pandas*

Aug 2026

- Modeled a lending protocol's on-chain liquidation stream (73,000+ events, Aave v2/v3) as a self-exciting Hawkes point process, deriving a USD-marked branching-ratio signal  $n(t)$  as a real-time early-warning indicator for DeFi liquidation cascades, as part of a 3-person research team
- Caught 100% of major cascades (98/98 Aave v2, 45/45 Aave v3 episodes) under pre-registered, walk-forward evaluation, holding false alarms to 0.14–0.18/week out-of-sample and warning ahead of 81% of eventually-liquidated USD on Aave v2 (\$3.34B of \$4.11B); co-authoring the results for a peer-reviewed journal

**LipSync AI** | *Python, PyTorch, MediaPipe, Django REST Framework*

2026

- Built a real-time lip-reading pipeline that extracts and normalizes MediaPipe FaceMesh landmarks and classifies word/phrase sequences with a bidirectional GRU (stratified splits, augmentation, gradient clipping, temperature-scaled calibration), served via a Django REST Framework backend (JWT auth, session-based prediction API, per-session feature caching) with real-time facial emotion analysis and a Vue/Nuxt frontend; extending the work into a research paper in preparation

**InsightX – LLM-Powered Complaint Intelligence** | *Python, Streamlit, LangChain, Llama 3*

2025

- Built an LLM-powered pipeline (LangChain over a local Llama 3 endpoint) that ingests customer complaint text and surfaces the most-affected product categories, locations, and sentiment trends via an interactive Streamlit dashboard with one-click report export

**Smart Attendance System** | *Python, Tkinter, face\_recognition (dlib), OpenCV, Pandas*

2025

- Built a real-time, role-based (Admin/Faculty/Parent/Student) desktop attendance platform using live webcam face recognition and time-limited QR-code check-in, with automated weekly/monthly email and PDF/Excel reporting and an audit log

## TECHNICAL SKILLS

**Languages:** Python, Java, C++, C, JavaScript, TypeScript, SQL

**Core CS:** Data Structures & Algorithms, Object-Oriented Programming, Database Management, Unit Testing, Version Control

**Frameworks/Libraries:** TensorFlow, PyTorch, LangChain, Scikit-learn, XGBoost, OpenCV, Pandas, NumPy, React.js, Node.js, Astro, Flask

**Developer Tools:** Git/GitHub, REST APIs, n8n, Streamlit, Playwright, pytest, Vercel, Netlify, Jupyter, VS Code

**Certifications:** NVIDIA – Building LLM Applications with Prompt Engineering; IIM Bangalore (edX) – FC101x: Corporate Finance; Accenture (Forage) – Software Engineering Job Simulation
