ANSH PARMAR

AI/ML Engineer | Software Engineer | AI Automation & Data Analytics

Mumbai, Maharashtra, India | +91 93241 52771 | p.anshu2005@gmail.com

linkedin.com/in/ansh-parmar | github.com/AnshParmar123 | Portfolio

Professional Summary

Artificial Intelligence & ML undergraduate with hands-on experience in **Artificial Intelligence, Machine Learning, Data Analytics, LLM Applications, AI Automation, and Full-Stack Development**. Experienced in building practical software solutions using **Python, PyTorch, TensorFlow, LangChain, OpenCV, Django REST Framework, React.js, TypeScript, Astro, Streamlit, and n8n**.

Strong experience working with real-world datasets, machine learning pipelines, AI-powered applications, business workflow automation, REST APIs, and production-oriented web solutions. Developed projects involving **DeFi event intelligence, real-time lip reading, LLM-powered complaint analytics, computer vision, facial recognition, and automated attendance systems**.

Foundation in **Data Structures & Algorithms, Object-Oriented Programming, DBMS, REST APIs, software testing, version control, data processing, and analytical problem solving**. Seeking opportunities in **AI/ML Engineering, Software Engineering, Data Analytics, Generative AI, and AI Automation**.

Education

Ramrao Adik Institute of Technology (RAIT), D. Y. Patil University **2023 – 2027**
Bachelor of Technology – Artificial Intelligence & Machine Learning **CGPA: 8.7/10**
Navi Mumbai, India

Professional Experience

3DOTS Creative Solutions **Jul 2026 – Present**
AI & Web Developer Intern | Remote

- Designed and shipped a production marketing website for **3DOTS Creative Solutions**, a creative agency, using **Astro, TypeScript, and CSS**.
- Implemented technical **SEO capabilities** including dynamic sitemap generation, robots.txt configuration, and Schema.org structured markup to improve search visibility.
- Developed an accessibility-first motion system focused on responsive, performant, and user-friendly web interactions.
- Built a **Playwright-based automated testing suite** covering forms, navigation, and responsive layouts across **12 viewport widths**.
- Automated client lead-intake and follow-up workflows using **n8n**, routing website form submissions to email and WhatsApp automatically.
- Currently extending the solution with an **AI chatbot** to support automated customer interaction and lead handling.

D. Y. Patil University, Navi Mumbai **May 2026 – Jun 2026**
Data Analytics Intern

- Cleaned, transformed, and engineered features across real-world datasets using **Python and Pandas**.
- Developed reusable Python scripts to streamline data preparation, transformation, and analytical workflows.
- Converted raw datasets into actionable insights and structured summary reports for faculty stakeholders.
- Applied data-processing and analytical techniques to improve dataset usability, interpretability, and reporting quality.

Selected Projects

CascadeSignal *Python | Hawkes Point Processes | On-Chain Data | Pandas*

- Modeled a lending protocol's on-chain liquidation stream containing **73,000+ events** from Aave v2/v3 using a self-exciting Hawkes point process.
- Developed a USD-marked branching-ratio signal $n(t)$ as a real-time early-warning indicator for potential DeFi liquidation cascades.
- Worked as part of a **3-person research team** on model development, validation, and evaluation.
- Detected **100% of major cascades**, covering 98/98 Aave v2 and 45/45 Aave v3 episodes under pre-registered walk-forward evaluation.
- Maintained out-of-sample false alarms at approximately **0.14–0.18 per week**.
- Generated advance warnings for **81% of eventually-liquidated USD on Aave v2**, representing $3.34B of $4.11B.
- Contributed to research work being prepared for **peer-reviewed publication**.

LipSync AI *Python | PyTorch | MediaPipe | Django REST Framework | Vue/Nuxt*

- Built a **real-time lip-reading pipeline** using MediaPipe FaceMesh landmarks for facial feature extraction and normalization.
- Developed a **bidirectional GRU model** for word and phrase sequence classification.
- Applied stratified data splits, data augmentation, gradient clipping, and temperature-scaled calibration during model development.
- Developed a **Django REST Framework** backend with JWT authentication, session-based prediction APIs, and per-session feature caching.
- Integrated real-time facial emotion analysis with the AI pipeline and developed the frontend using **Vue/Nuxt**.
- Extended the project toward a research paper currently in preparation.

InsightX – LLM-Powered Complaint Intelligence *Python | Streamlit | LangChain | Llama 3*

- Built an **LLM-powered complaint intelligence pipeline** using LangChain with a local Llama 3 endpoint.
- Designed the system to process customer complaint text and identify **product categories, geographic locations, and sentiment trends**.

- Developed an interactive **Streamlit dashboard** for visualizing complaint insights and analytical patterns.
- Added one-click report export functionality to simplify sharing and distribution of analytical findings.

Smart Attendance System *Python | Tkinter | face_recognition | dlib | OpenCV | Pandas*

- Developed a real-time desktop attendance management platform using **webcam-based facial recognition**.
- Implemented role-based access for **Admin, Faculty, Parent, and Student** users.
- Integrated time-limited QR-code check-in as an additional attendance mechanism.
- Automated weekly and monthly reporting through **email, PDF, and Excel outputs**.
- Implemented an audit-log mechanism for maintaining attendance activity records and traceability.

Technical Skills

Programming Languages: Python, Java, C++, C, JavaScript, TypeScript, SQL
Artificial Intelligence & Machine Learning: Machine Learning, Deep Learning, LLM Applications, Generative AI, Natural Language Processing, Computer Vision, Prompt Engineering, Sentiment Analysis, Facial Recognition, Sequence Classification, Model Evaluation
AI/ML Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, XGBoost, LangChain, OpenCV, MediaPipe, face_recognition, Pandas, NumPy
Web Development: React.js, Node.js, Astro, Flask, Django REST Framework, Vue/Nuxt, HTML/CSS, REST APIs
Data & Analytics: Data Cleaning, Feature Engineering, Exploratory Data Analysis, Data Processing, Statistical Analysis, Data Visualization, Real-World Dataset Analysis
Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Unit Testing, Version Control
Automation & Developer Tools: n8n, Git, GitHub, Streamlit, Playwright, pytest, Vercel, Netlify, Jupyter, VS Code
Testing & Quality: Automated Testing, Playwright, pytest, Unit Testing, Responsive Testing, API Testing

Certifications

- **NVIDIA** – Building LLM Applications with Prompt Engineering
- **IIM Bangalore (edX)** – FC101x: Corporate Finance
- **Accenture (Forage)** – Software Engineering Job Simulation
- **MyCaptain** – Android App Development
- **Google Cloud** – Career Launchpad – Generative AI Leader Track

Core Areas

Artificial Intelligence | **Machine Learning** | **Deep Learning** | **LLM Applications** | **Generative AI** | **Computer Vision** | **NLP** | **AI Automation** | **Data Analytics** | **Software Engineering** | **Full-Stack Development** | **Web Development** | **REST APIs** | **Test Automation** | **Research & Development**
